

Expert Authority & US Visa Strategy

Prepared for Quantrex - Elite AI Automation

Proposed Candidate: Davi Alves

Expertise: AI Media Engineering & Technical Visualization

Visa Path: O-1A / EB-2 NIW

Executive Summary

This report outlines the immigration strategy for Davi Alves as a core technical specialist for Quantrex. The strategy focuses on establishing "Extraordinary Ability" through high-impact technical publications, media recognition, and specialized orchestration of AI systems.

1. H-1B Alternative: The O-1A Path

The O-1A visa provides a non-lottery based solution for top-tier talent. By executing the "Authority Sprint" (Articles, Speaking, and Media), Davi fulfills the following USCIS criteria:

- **Authorship of Scholarly Articles:** Through deep-dives in Substack/Medium.
- **Critical Role:** Serving as the lead for visualization logic at Quantrex.
- **Media Recognition:** Features in specialized tech newsletters and industry-leading engagement.

2. National Interest Waiver (EB-2 NIW)

USCIS recognizes AI automation as a field of National Importance. Davi's work in "Transparent AI Orchestration" directly supports US competitiveness by reducing system friction in enterprise settings.

3. Chronology: The 90-Day Authority Sprint

- **Days 1-15:** Publication of core articles and LinkedIn activation.
- **Days 16-45:** Speaker submissions for 2026 AI Summits.
- **Days 46-90:** Evidence collection and legal filing with Quantrex counsel.
